

Session #1 Target 2856-6552A

Bio man made and motion upwards ideograms.

Preliminary S2: white, soft, spongy, curving, bubbly, light, ope, outside above, grey, dark, upwards idea.. hexagon

AOL - Moon

AI - Feel some curving hexagon like shape thinking dark environment like geodesic shape

Man made with hexagonal geodesic like idea.

white, spongy feel, curved, vertical on base surface.

quiet and still here and has airless quality.

feel in space land feels irregular, flat, grey, bumpy, hard, dusty.

has a curving element to it.

feels remote AOL - Geodesic Dome, Moon surface

Get man made again but feels different.. angular, flat parts, head, grey, longer in length, feel of metallic?..

AOL - grey object that feels like a vehicle.. UFO Like this man made is on base surface in distance, slick, angular feel

AOL - UFO on moon watching Astronauts on Apollo Mission from distance

Break

Feels very quiet here, still, dusty dry rugged environment ... this place has an airless quality like gravity is different.. rocky surface feel..

AI - Feel I'm on another Planet like Moon.. in space

AOL - of this Sundays group target.. UFO parked on moon

AI - Feel I'm on base surface of another planet, grey rocky feel, Reminds me of moon, dim dark and airless....

AI - something feels hidden away, not visible or out of sight .. feel 2 different man makes here stand out.. sense of Bios but not yet detected

AOL - Dark side of Moon, Break

Q

Put the writing samples in bin
in the Museum

Session #1 Target 2856 6552B

Man made, biological/multiple with motion upwards feel..

get Red, wine colours, dim dark, soft shiny, light radiant growing luminous , centrepoin outwards, curving , hex , , energetics light , frequency, expanding

AOL - Eyeball lens , super nova

AI - feeling of some curved , red/wind colour in dim background, feel of light and energy

Wine colour feels soft, flashing , centered, glowing bright, outwards.. feel of expansion, centered with like radiating lines from center

AI - idea of infra red like light coming from center to outwards

Feel of heat, spiral like , glowing Refractory Light? Reminds me of looking at an Eyeball lens , subtle but details up close

Feels remote, distant, not necessarily science astronomy but trigger those ideas.. above in space

AI - idea of Refractory light, frequency, energy, detail

Spiral effect from center, wave form .. some kind of lines coming / going to center...

AI - has a funnel feeling.. feel pulled towards this or drawn to it .. wine tinge subtle glow

Move to glow - has an orb like radiance .. "entry point?"... quantum tear in fabric of ??? ... something unusual about this

AOL - Spiral galaxy, Stargate Move to funnel - goes from wider to narrow, drawn inwards, orb like heat , frequency

Get natural and man made, maybe manipulated, not in a bad way .. more utilized

AOL - nasa footage of UFOs popping in and out of our reality Feel in something like a funnel, lines or linear element through some curved hex like pattern..

AOL - Quantum hole, dimensional tear, like a gate.. hard to find words

"Lens" and "Refractory" words pop up again ... idea of bending light

AI - Feel of Refractory light bending, I have no idea what that means .. its being bent .. weird I don't want to commit to man made but I get the idea and ideograms.

It's understood at some level

Weird Sci fi feel here!

Get "origin point" .. no idea what or why.. deep space connection

Motion – feels upwards, through, long , wide to narrow flashing, infra red, light , sense of energy pulled through

AOL - Travelling in space and time..inter-dimentional feel.. crossing dimensions?

Intelligence to the target that gives me ET vibe but not the usual fer!.. something very advanced... get a sense of powerful minds behind this, laws of quantum universe are understood... not sure what's going on but complex.. players behind this are hard to identify but if human they display knowledge and understanding that's way advanced Break Hmmm.. maybe AOL, If not, strange as fuck

Page 8

53 [2021]

Q1- Was an orb like Radiation to it

Why point?

Quicker tear in fabric of

Something unusual about this light

Not Star gate

[more to find effect and describe]

with to narrow / drawn upwards

orb, heat, frequency

Get noticed and now made, Manipulation, Not in best way, utilizing it

Dark around this, coming contained

Reminds me of bridge of, Not-UFOS coming in & out of our reality

[Merge with coming since they are describe]

As feel me in another the-panel lines or learn through hexagon to avoid, yellow, depth,

Not Quantum note / dimension tear / gate hard to describe
