

Session #1 Target 1143 2965

Bio, energetics, man made ideograms. Preliminary S2 of dark, black, red, dim, light, smooth, reflective, shiny, hard, angular, rocky, irregular, blotchy, red, glowing, open, outside

AOL - Apollo Target

AI - Feel of familiarity, red/black colours, man made near land

Get wavy across energetics I think, beige, brown, irregular, gritty, sandy, rough land, open perspective, bumpy, hard, warm barren base surface, no foliage, dry desert feel

Feels remote, desolate and dry landscape .. quiet here

Wavy energy again man made, angular dark, motion, .. feel of land,

I get a feel of something in motion feel that feels on a direction close to land, just above surface.. almost skimming

Man made that feels like its non surface, long from side view, in fast motion .. like a craft

AI - Feels like evasive action

AOL - Stars wars battles where craft are being pursued and drop close to land to evade I fast erratic motion

Back to man made again, energetic connection, fast directional movement, just above surface, ..

Move to cause of evasive action- start to get space/air feel, hover motion, it feels higher up now, more calmer.. coming down closer.. bright, brown, beige hazy atmosphere, .. get very curved, oval man made, .. aerodynamic, slick, big, metallic, hovering

I do a timeliness to try connect what these parts mean.. feel it was taking evasive action to avoid something and impacts with land... man made in motion decent at fast pace close to base surface avoiding, evading erratic motion ST speed

Man made has a smooth disc like feel, big, wide .. frizz bee look, beveled at sides, metallic

AOL - Laser beam

Location is remote, quiet, sandy, brown, desolate, barren, rocky

AAOL - Idea of Mars... feels off planet

Inside man made- advanced, technology, complex,

AI - feel of Bios appear small.. AOL - Greys

Inside seems wide, bright, curving, like a cockpit wide, lots of space, multiple biologicals, hard to make out but my feel is greys as I get insect like in their movements and body type

Break

Was trying to hold off the apollo AOL from start so not sure did I go full on epic with this 😊

Page :- 11

Sis (B)

feels Acoustic, Starts, Heavy, Skimming feet

feet it was taking course action to avoid swallowing and impact with land

Ad-lizer Ben

Comes to Stationary position

Change with near middle
long smooth disc shape but Bay in

Last morph & Head

Banded ab
wid
neto

This location is remote, quiet, Sa
desolate & barren, rocky

idea of Mats
feels off planet

At feet of something in water just above land
 At mid-skimming across the surface
